Incident Report: ssh-brute-force

Report ID: IR-01
Date: 2026-10-26
Analyst: Lekhraj Dheerani

1. Executive Summary

On October 26, 2026, a simulated SSH brute-force attack was executed against the localhost (Kali Linux) targeting the SSH service. The Wazuh SIEM successfully detected the attack using custom rule 100002, generating a high-severity alert after observing 5 consecutive failed login attempts within 60 seconds. No successful unauthorized access was gained, and the activity was logged for further analysis. ## 2. Attack Details | Field | Value | |——-|——-| | Attack Type | SSH Brute Force | | Source IP | 127.0.0.1 (Localhost) | | Target | Kali Linux (localhost) | | Port | 22 ssh| | Duration | 20 seconds | | Attempts | 20 |

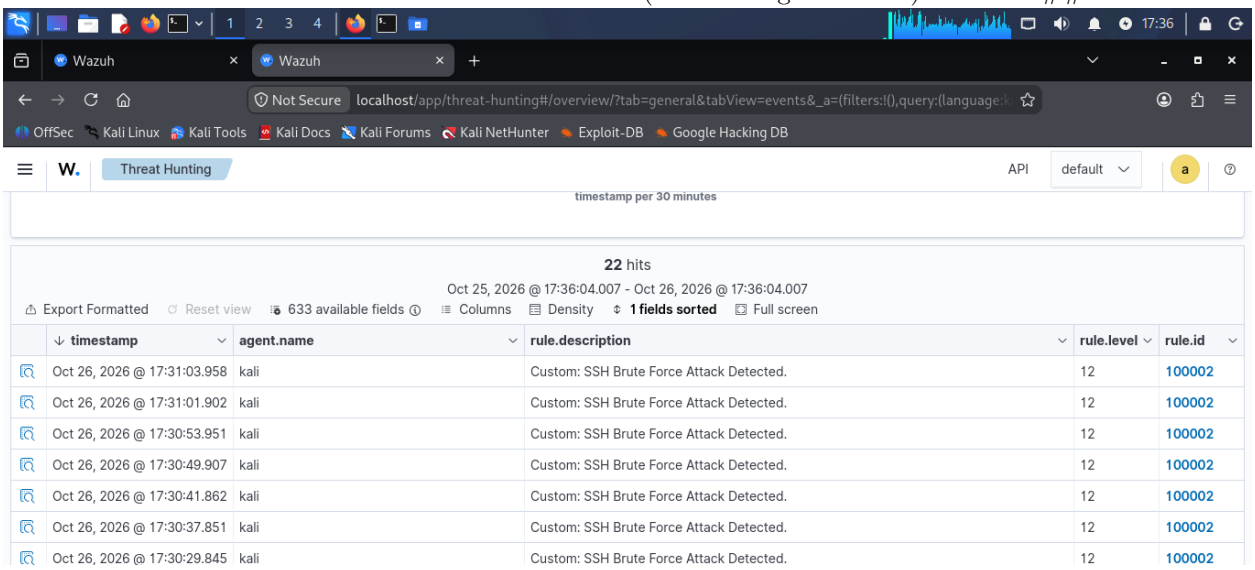

3. Detection

Rule ID: 100002 **Rule Level:** 12 **Rule File:** `local_rules.xml`
MITRE ATT&CK: T1110

Rule Logic

5710 Custom: SSH Failed Login Attempt Detected. T1110

100001 Custom: SSH Brute Force Attack Detected (5 failed logins in 60s). T1110 ## 4. Evidence
